

Environmental Management Systems

Cameron-Cole advises clients on how to attain the best Environmental Management System (EMS), Health and Safety Management Systems (HSMS) or Environmental Health and Safety Management Systems (EHSMS) solution for their organization, and assists with the integration of these programs into their business operations, products, processes and supply chains.

Cameron-Cole has expertise in developing and implementing EMSs and HSMSs, including custom management systems, ISO 14001 EMS, OHSAS 18001 HSMS, and OSHA Voluntary Protection Programs (VPPs). For document management, Cameron-Cole has a range of proprietary solutions, or helps clients select an appro-

priate EHS Management Information System (EMIS).

Our approach includes –

- "Gap Analysis," resource plan and budget
- Implementation of the recommended EHSMS
- Assistance with internal auditing and management review

Our staff has been assisting clients since 1994 in the development and implementation of EMSs and HSMSs, helping to use international standards to make local business sense.
