

Waste Cost Reduction Services

Cameron-Cole, LLC offers a comprehensive waste management program aimed at diverting waste from landfill to recycling and reuse, and achieving zero waste to landfill. We take complete control of your waste disposal and recycling operations and design and implement specific programs and processes that will reduce your waste production and associated costs. This is achieved by:

1. Working with buyers to identify supply chain vendors to substitute materials that eliminate or reduce upstream sources of nonrecyclable materials
2. Design and implementation of operation specific programs tailored to achieve zero waste to landfill objectives such as: maintenance and repair waste recycling and reuse; food and restroom paper towel waste composting; use of vendors/suppliers that provide reusable/recyclable materials; implementing electronic communications programs, e.g., electronic expense reports, memos, personnel reviews, etc.; furniture reuse and recycling
3. Employee behavioral training, education and incentive programs
4. Performing waste stream characterization that identifies sources, practices efficiency and cost saving measures
5. Monitoring and negotiating reuse markets and recycling commodity values to ensure the most favorable rates
6. Establishing benchmarks and achievable waste reduction metrics

Our services include —

- Negotiating and contracting directly with all waste and recycling companies
- Coordination of multiple vendors including pickups, frequency and resolving service problems
- Managing billing and recycling credits to ensure accuracy and maximize cost reduction
- Routine audits of collection areas and implementation of corrective actions
- Process/procedure analysis focused on waste reduction
- Upstream and downstream waste characterization
- Identification, design and implementation of waste reduction programs
- Employee behavioral/education training and promotional campaigns
- Monthly/annual reporting of waste reduction and cost saving accomplishments
